ABOUT THE CONFERENCE

Dear Colleagues,

It is our pleasure to welcome you to the **23rd Annual Meeting - iMas Dubai 2025** - The International tMinimal Access Surgery Conference at the Metropolitan Hotel Dubai on June 20-22, 2025.

This event represents a significant and major advancement from the annual ICAGE meeting, which was established in 2010 in the United Arab Emirates by Prof. Dr. Rajesh Devassy and Prof. Dr. Rudy Leon De Wilde. We are now embarking on a new phase, offering a thoughtfully crafted experience that focuses on the principles and best practices for Complex Gynecological treatments with technological advancement and sustainable ethical practice.

Our program offers a dynamic mix of live surgery demonstrations, cutting-edge lectures, case discussions, and debates to provide a thorough exploration of the subject. Leading key note speakers from Europe and around the globe will showcase this subspecialty. Additionally, the program includes pre-conference workshops on Robotics, ESGE-GESEA Level 1 and 2 Training, POP modular hands-on training designed for GESEA Level 3, featuring a Hysteroscopic Wet Lab for IBS Shavers, Bipolar, and Mini Resectoscopes.

Participants will receive clinically relevant updates and hands-on educational experiences. A dedicated half-day session for Parallel screens with Live surgical demonstration of complex gynecological disease will give you the chance to learn from esteemed experts who will share their valuable insights and expertise.

For emerging gynecologists, the conference provides educational courses from the ESGE ACADEMY and hands-on training workshops designed to enhance surgical skills.

The extensive exhibition at iMaS Dubai offers pharmaceutical and technology companies a chance to display their latest innovations. Join us at iMaS Dubai 2025 for a transformative and enriching experience.

A LEADING EVENT IN THE REGION FOR **GYNECOLOGIC HEALTH CARE**

Don't miss out-join us at the 2025 Annual conference of iMaS Dubai! Dubai has become an Iconic city of life known to everyone in the planet and now to the medical scientific community as well. Whether you're an expert professional or new to the field, this event is the perfect opportunity to forge new connections, expand your professional circle, and dive into the latest industry breakthroughs. Engage with trailblazing leaders, spark vibrant discussions, and gain invaluable insights that will help you enhance the skills you need to further your career.

Our abstract platform is now open for submissions. We would like to invite everyone with a passion for Gynecological minimal-access surgery research to be a part of our meeting. Present your part of contribution to the scientific world with an oral presentation, as an e-poster or videos and have a chance to be even on stage in the Presidential plenary session.

This year's meeting will include a focus on expert "how-I-do it" video-driven education, instruction on the incorporation of technology into practice, and the introduction of new and emerging innovation. We are excited to dive into the future of Surgical and Fertility treatments and discuss best practices for patient optimization. We are collaborating with multiple surgical experts to bring the best and brightest to you in an action packed weekend in Dubai of education and networking.

CONFERENCE OVERVIEW

CONFERENCE HIGHLIGHTS

- Evolution from radical surgery to fertility conserving treatments in complex gynaecological diseases
- Global experts explore treatments for minimal-access surgery in hysteroscopy, laparoscopy and robotics
- International multi-centre live surgery
- Hysteroscopic wet lab, GESEA , robotics and POP hands-on training course

TARGET AUDIENCE

General Surgeons • Gynecologists • Urologists
Oncologists • Fertility Healthcare Experts • Anesthesiologists
Endoscopists • Interventional Radiologists • Gastroenterologists
Surgical Residents • Medical Fellows • Nurses
Allied Health Professionals

ROBOTICS COURSE **OVERVIEW**

Dive into the transformative world of robotics in surgery at the International Minimal Access Surgery Conference 2025. This specialized course, led by renowned experts Prof. Laurent de Landsheere and Prof. Tommaso Simoncini, will offer invaluable insights into the integration and advantages of robotic systems in modern surgical practices.

Key Highlights:

1. Strategic Implementation

- Learn how to select the right robotic system based on your hospital's infrastructure.
- Explore space management strategies for seamless implementation.

2. Cost-Efficiency and Case Selection

- Tips for managing costs while maximizing the efficiency of robotic systems.
- Discover which cases are ideal for robotic-assisted surgeries.

3. Anatomical Precision

- Understand how anatomical dissection is enhanced through robotic technology, offering unparalleled precision and safety.

4. Application in Complex Diseases

- Gain insights into managing complex diseases with robotic-assisted surgical techniques.

This course is designed for surgeons eager to advance their skills and institutions looking to enhance patient outcomes through cutting-edge technology. Live surgery demonstrations and interactive lectures make this session a must-attend.
